CS Students, internship reports should be prepared according to the following rules:

1. If you complete CS300 and CS400 in the same place, TWO separate REPORTS should be prepared for CS300 and CS400. (Exceptions are not accepted).

2. If you complete CS300 and CS400 in the same place, the first sections may be similar, but the other sections must be different from each other. While the first 20 days are a little more theoretical and focused on the learning process (may include small code examples in the learning process), the second 20 days can be more practical.

3. If you complete CS300 and CS400 in the same place, you will provide just ONE internship evaluation form, you do not need to send two separate evaluation forms.

4. Each REPORT should be around 15-20 pages at least.

5. Each section should be at least half a page.

6. Be sure to include small code snippets and screenshots of your program in the report.

7. Do not provide huge codes in blocks. (important small code snippets are enough)

8. Do not put code snippets and screenshots in appendixes. Put them just below the place where it is explained in detail in the text.

9. Do not put just the codes, explain each code snippet in the text in detail.

10. Note the reference format, edit it appropriately.
